

# Anthony Nwobodo

Enugu, Nigeria

+2349034853719 | anthonymwobodo7@gmail.com

---

## Skills

- Web Development (Web2.0 & Web3.0)
- Blockchain Development
- Enterprise Software Development (Odoo ERP)
- Mobile Development

---

## Stack

- **Web Development (Web2.0)**  
Typescript, JavaScript - React, Node - AdonisJS and Express, Python -Django
- **Web Development (Web3.0)**  
Typescript, JavaScript - React, Vuejs
- **Blockchain Development**  
Ethereum - Solidity, Hardhat framework, The Graph Protocol - GraphQL
- **Database Management**  
Postgresql, MongoDB
- **Enterprise Software development(Odoo ERP)**  
JavaScript, Python, XML
- **Mobile Development**  
React Native

---

## Experience

- **Afro Apes Community** January, 2022 - present  
Blockchain / Web3.0 Developer  
AfroApes is Community building an Afrocentric presence in the Blockchain space, especially with our unique and beautiful NFT Arts that show the African history and culture.  
  
<https://discord.gg/nMdgHVUJEt>
- **eSoft Response** September, 2021 - May, 2022  
Software Engineer  
As a Backend Engineer, I built APIs for the different web applications and also for mobile applications.
- **Ehio Technologies** July, 2020 - August, 2021  
Software Developer  
I worked with a team on Enterprise software development, using the Odoo ERP.  
I built many customization modules and created many automation scripts for clients across the world for their business needs
- **Genesys Tech Hun** June, 2020 - December, 2020  
Backend Developer  
I worked as a Backend developer, worked on projects with a wonderful team.

---

## Education

- **University of Nigeria**  
B.A English and Literary Studies

---

## Projects

- **SpecNota**  
A web based project management and collaboration tool. Built with Django for the backend  
  
I inherited the Django codebase, made some modifications and started reimplementing the entire Backend with Nodejs  
  
[www.specnota.app](http://www.specnota.app)

- **Swapstall**

A currency swapping Fintech application which allows users who probably live abroad or have a foreign and domestic bank accounts to list their swap deals for a currency exchange.

I built the backend APIs for this mobile application

Built with Nodejs/Adonis

<https://play.google.com/store/apps/details?id=com.esoftresponse.swapstall>

- **IntaChurch**

A management App used in managing church activities, taking church members data, and organizing events.

I worked on the backend of some of the Apps services, it has a microservices architectural design.

Built with Nodejs/Adonis

<https://play.google.com/store/apps/details?id=com.instachurch.app>

- **Developer Cycles Training with Andela Capstone Project**

This project was a backend Application done as a completion task of DevC Training, it was named "Teamwork", an internal social networking System for a company.

<https://teamwork-backend-api.herokuapp.com/api/v1>

Tech - Nodejs, Express, and Postgresql as its database.

- **Digital CV Maker**

A web Application that makes it easy for one to create and have a PDF copy of their CV. It allows you to create an account, set up your profile, select a CV template of your choice, then download as PDF.

<https://github.com/francosion042/cv-maker>

Tech - Django, Postgresql

- **DEV-BuildforSDG-Assessment-COVID19-Estimator**

This was an eligibility assessment for the 2020 #BuildforSDG program

The assessment empowered me to attempt helping society and leaders prepare for the real big problem of COVID-19, which is its impact on lives, health systems, supply chains, and the economy:

It was a backend task, done with Nodejs and express

---

## Blockchain/DApp Projects

- **AfroApes NFT Contracts**

As a member of the community's Dev team, I contribute to the community's Smart Contracts and DApps.

- implemented ERC721 and ERC1155 standards for the AfroApes NFT collections and Collectibles.

- **Escrow Contract**

Created a two-party Escrow system which ensures security and removes the need for a middleman serving as the bridge for the two parties.

- **AfroApes NFT Minting DApp**

I contributed to the Wallet connection and NFT Minting logic of the AfroApes community website.

- **AfroApes Subgraph**

I created and deployed a subgraph which indexes the AfroApes contract, captures events emitted from the contract and then create entities for storing the data on The Graph's decentralized network

- **DecentraSound Mobile DApp**

A Decentralized Music streaming App with all the functionalities of Traditional music players like Apple Music and Spotify.

Albums here are NFT collections, and the songs are NFTs.

- **DecentraSound**

A platform for music artists to tokenize their songs, it helps them deploy a custom smart contract of either ERC721 or ERC1155 standards without having to write any code.
